```
[kianz001@empress cs111]$ emacs calendar.cpp
[kianz001@empress cs111]$ /cs/slott/cs111/calendar
What is your user id (e.g. smith001)? ==>kianz001
What is your programmer number? ==>30

--- you are  --------
30 Ryan

Is the information correct? Type y or n then hit Enter ==>y

*************************************************************************************************************
Uploading your calendar.cpp was successful.
*************************************************************************************************************

*************************************************************************************************************
Uploading your input.h was successful.
*************************************************************************************************************

*************************************************************************************************************
Your program successfully compiled
*************************************************************************************************************

*************************************************************************************************************
Your outputs are correct.
*************************************************************************************************************

--- You are  --------
30 Ryan
================ Here are the outputs using your program ==============
================ Compare your outputs to the expected outputs found in /cs/slott/cs111/calendar.out ==============
