```
[kianz001@empress cs111]$ g++ clock.cpp
[kianz001@empress cs111]$ ./a.out
Enter hours: 3
Enter minutes: 45
The angle of the hour hand is : 112.5
The angle of the minute hand is : 270
[kianz001@empress cs111]$ emacs clock.cpp
[kianz001@empress cs111]$ g++ clock.cpp
[kianz001@empress cs111]$ ./a.out
Enter hours: 3
Enter minutes: 45
The angle of the hour hand is : 112.5
The angle of the minute hand is : 270

[kianz001@empress cs111]$ /cs/slott/cs111/clock
What is your user id (e.g. smith001)? ==>kianz001
What is your programmer number? ==>30

---- you are  --------
30 Ryan

Is the information correct? Type y or n then hit Enter ==>y

**********************************************************************************************
Uploading your clock.cpp was successful.
**********************************************************************************************

**********************************************************************************************
Your program successfully compiled
**********************************************************************************************

**********************************************************************************************
Your outputs are correct with these test cases. We will use different test cases when we grade your program.
**********************************************************************************************

---- You are  --------
30 Ryan
================ Here are the outputs using your program ===============
================ Compare your outputs to the expected outputs found in /cs/slott/cs111/clock.out ==============
Enter hours: Enter minutes: The angle of the hour hand is : 112.5
The angle of the minute hand is : 270

[kianz001@empress cs111]$ █
```
