```
[kianz001@empress cs111]$ /cs/slott/cs111/array
What is your user id (e.g. smith001)? ==>kianz001
What is your programmer number? ==>30

---- you are  --------
30 Ryan

Is the information correct? Type y or n then hit Enter ==>y

*******************************************************************************************************
Uploading your array.cpp was successful.
*******************************************************************************************************

*******************************************************************************************************
Your program successfully compiled
*******************************************************************************************************

*******************************************************************************************************
Your outputs are correct with these test cases. We will use different test cases when we grade your program.
*******************************************************************************************************

---- You are  --------
30 Ryan
================= Here are the outputs using your program ==============
================= Compare your outputs to the expected outputs found in /cs/slott/cs111/array.out ==============
-----------------------------------------------------------------
1) fill 2) print 3) reverse 4) average 5) highest 6) double 7) bar graph 8) selection sort ascending 9) selection sort descending 10) sequential search 13) quit
-----------------------------------------------------------------
Enter your choice:
